

PYTHON PROGRAMMING

DURATION: 30 HOURS

Objective:

Python is one of the very popular languages which is used for creating high performance applications. Our Python Programming course is all set to hone your programming skills. With our course, you will learn the basics of Python programming with the small programs, moving on to the conditional statements, loops, and functions in Python. You will be learning every concept of Python programming. By the time, you will complete the course you will be an intermediate level Python Programmer.

Modules:

- Usage of Python
- Input and Output Statements
- Variables and Data Types
- Conditional and Iterative Constructs
- Arrays and Structures
- Creating Functions
- Built-in Functions
- Data Persistence
- Understanding Collection Operations
- Regular Expressions
- Python PIP
- Introduction to Popular AI libraries in Python

Exit Profile:

- Junior Python Programmer
- Python Developer Trainee
- Python Software Engineer
- Python Scripting Assistant
- Python Support Specialist
